

A.C.C.R.

Dry Ammonia, Chlorine & Chloramine Remover

- Non-Toxic to Fish, Invertebrates, Aquatics Plants, Humans & Pets
- Safe For Use on Food Fish & Shellfish
- Will Not Negatively Affect Biological Filter Beds
- Will Not Affect Dissolved Oxygen Levels in Water

Fritz ProAquatics A.C.C.R. completely neutralizes ammonia, chlorine and chloramines, protecting fish and other aquatic life in both fresh or saltwater.

Dosage / Instructions:

1 teaspoon will treat approx. 40 gallons (151 L) -or- 32 g per 1,000 L (264 gallons). Using this dosage, 1.0 mg/L ammonia will be instantly eliminated, as well as chlorine and chloramines. A.C.C.R. dosage can be safely increased to remove greater amounts of ammonia. Water treated with A.C.C.R. cannot be accurately tested with Nessler ammonia test kits nor with Winkler dissolved oxygen (DO) test kits because A.C.C.R. interferes with the reagents used in these tests. Salicylate ammonia test kits are recommended when using A.C.C.R.

NOTE: Due to the variation of granular size, conversion between volume and weight of powdered products are approximate; as a precaution, dose less than the calculated amount and measure the effect before adding the total amount. CAUTION: Avoid contact with eyes, skin and clothing. Wash hands after handling.

STORAGE: Store in a cool, dry place with lid tightly sealed. Keep out of reach of children
